Solution-3

```
Sub_Set = input('Enter the Subset:')
```

```
Print('Enter the Set :$', end = '')
```

```
given_set = list(map(str, input().split()))
```

```
Output_Set = []
```

```
c = len(Sub_Set)
```

```
for i in given_set:
```

```
    if i[:c] == Sub_Set:
```

```
        Output_Set.append(i)
```

```
Print('Output Set is : ', Output_Set)
```
